

WRS INDUSTRIAL

BUNNINGS TRADE

Description:

Trade Warehouse

Location:

Murwillumbah

Office:

Queensland

Bunnings Trade Warehouse, is the second building to be completed by Williams River Steel in Industry Central at Murwillumbah. The full "turn key" development, comprising of two sections, one an enclosed warehouse which totals 2000sqm and the other an open warehouse of 2000sqm for storing all of the timber sales, also includes another 9000sqm of external concrete pavement. Careful planning went into the site to accommodate b-double trucks for delivery and stocking of materials.

Heavy rain impacted the site within the last few weeks of production but we were still on target for handover as scheduled. Our clients fit out the premises themselves with internal shelving and pallet racking to suit the purpose designed building for the trade industry and are now fully operational.

The development is a feature within the Industry Central Estate, as a key international tenant taking advantage of prime position and costs that are available from the developers of the estate to the region.

Further information can be obtained on Industry Central by visiting www.industrycentral.net.au or follow links from the WRS website homepage.
