

## WRS SCHOOLS

### CANTERBURY COLLEGE

**Description:**

Multipurpose Building

**Location:**

Waterford, QLD

**Office:**

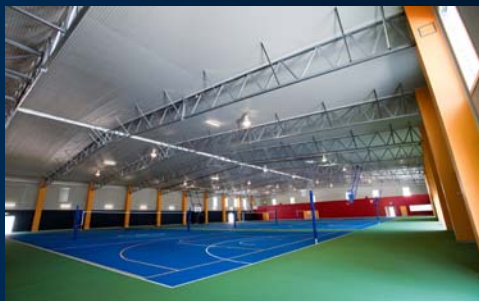

Queensland

Students at Canterbury College are now enjoying full use of their new multi purpose building.

Williams River Steel designed and built the building, which stands at 9m high with a floor area over 3000sqm and features three indoor sports courts (basketball, netball, volleyball), a gymnasium on the 250sqm mezzanine level, staging area & VIP viewing area for stage productions. A kitchen with internal and external serveries, amenities & change rooms along with large undercover awnings over the entry and external servery complete the project.

Part of WRS contract included site works, for the removal & replacement of 3 outdoor courts which are now located inside for all weather convenience.

Large aluminium louvre panels are featured to assist with cross ventilation, plus separate entrance points for the gym and the main auditorium, acoustic sheeting and insulation internally for stage productions and the roof and walls are fully insulated for comfortable conditions year round.
