

WRS COMMERCIAL

IGA POTTSVILLE

Description:

Shopping Complex

Location:

Pottsville NSW

Office:

Queensland

In the design phase for 2 years prior to its completion, the new IGA store & shopping centre has set the benchmark for modern designed buildings for the main street of Pottsville.

Alongside the IGA store within the centre, there is also a Real Estate, Solicitor, Lolly Shop, Post Office & Laundromat.

The building design consists of 150mm Precast Spin Up concrete panels with structural steel for the roof and centre awning. Internal fit out of the IGA was completed with new cool rooms/freezers and all internal shelving.

Due to the location of the building it took careful planning for construction so there would be as little inconvenience to the town centre as possible.

This is due to having to upgrade the entire footpath to help meet current council regulations. It was also found that there was fibre optic cable 200mm below the existing pavement level, this is turn had to be lowered to accommodate the new levels.
